Version: 9.0

Question: 1	
Which three hypervisors are able to support High Availability for Virt	cual Machines? (Choose three.)
A. Microsoft Virtual PC B. Citrix	
C. Parallels Desktop	
D. HyperV	
E. RedHat	
F. VMWare	
	Answer: BCF
Question: 2	
Question. 2	
Which two options need to be considered to build a context aware in	nfrastructure? (Choose two.)
A. VLAN segmentation for every application type.	
B. The design of data formats and network protocols for the platform	1.
C. Creating zero connectivity environments for sensitive data.D. The building of basic services in the infrastructure, includin	a automatic nath creation and
proximity-based discovery.	g automatic path creation and

A cloud administrator is migrating a VM to the Intercloud Fabric Cloud. What option lists the steps that are needed to achieve this task?

A. Log in to the InterCloud Fabric

Choose Intercloud > Compute

Choose the virtual datacenter and select the VM tab

Choose VM from the list and click Tag VM(s) for Migration button

Enter name of VM

Choose destination VDC

Select OS version

Click Proceed

B. Log in to the InterCloud Fabric

Choose Intercloud > IcfCloud

Choose the virtual datacenter and select the IcfCloud tab

Choose VM from the list and click Migrate VM to Cloud button

Enter name of VM

Choose destination VDC

Select OS version

Click Proceed

C. Log in to the InterCloud Fabric

Choose Intercloud > IcfCloud

Choose the virtual datacenter and select the VM tab

Choose VM from the list and click Migrate VM to Cloud button

Enter name of VM

Choose destination VDC

Select OS version

Click Proceed

D. Log in to the InterCloud Fabric

Choose Intercloud > Compute

Choose the virtual datacenter and select the VM tab

Choose VM from the list and click Migrate VM to Cloud button

Enter name of VM

Choose destination VDC

Select OS version

Click Proceed

- A. Option A
- B. Option B
- C. Option C
- D. Option D

Answer: C

Question: 5
A cloud administrator must deploy a private Cloud. The design is focused on the need to accelerate applications delivered from private and virtual private cloud infrastructure, using policy-based ondemand orchestration. Which two products are the most beneficial to these efforts. (Choose two.)
A. VSG B. Cisco Nexus 1000v C. ASAv D. vNAM E. Cisco vWAAS
Answer: BE
Reference: http://www.cisco.com/c/en/us/products/collateral/routers/wide-area-application-services-waassoftware/solution_overview_c22-620028
Question: 6
A cloud administrator is considering the appropriate solution to automate a hybrid cloud deployment. The solution requires a single pane of glass infrastructure management, monitoring, health dashboard, orchestration and a self-service portal. Which solution is most appropriate for this environment? A. PSC B. Cisco UCS Director C. Cisco IAC D. Cisco Enablement Platform
Answer: A
Question: 7
A cloud administrator is considering storage for a deployment. The admin needs a solution that is durable and reliable and fits the need for storing media, web assets, and backups. Which solution meets this need the best?
A. cloud file storage B. cloud block storage C. cloud hybrid storage D. cloud NFS storage

Question: 8	
Which solution provides centralized automation and policy-driven appl	ication profiles?
A. APIC	
B. OpenDaylight	
C. VACS	
D. CML	
D. CIVIL	
	Answer: A

Question: 9	
When considering a private cloud integrated infrastructure, which so	
before being delivered to a customer only using EMC, Cisco, and VMwa	re?
A. FlexPod	
B. VBlock	
C. NFS	
D. VSPEX	
E. SAN	
	Answer: B
Question: 10	
Which statement about file-level storage is true?	
A. It is well suited for bulk file storage.	
B. Support external boot-up of systems connected to them.	
C. It is complicated to implement.	111 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1
D. It can store files and provide storage required for special applications	s like database VMFS.
	Answer: A
. File level store as systems are well suited for bulk file store as	

: File level storage systems are well suited for bulk file storage. Reference:
